🔗 albamora.dev/

Software Developer (Trainee) at Siemens with experience in backend and web development, building scalable applications and automation tools using Python and modern web technologies.

Skilled in Python, JavaScript, Angular, and PostgreSQL, with hands-on experience developing APIs and deploying applications using Docker and Kubernetes.

AWS Certified Cloud Practitioner, currently expanding expertise in cloud technologies, data platforms, and artificial intelligence while preparing for further AWS certifications in DevOps and Data Engineering.

Actively seeking new challenges where I can continue growing as a developer and contribute to innovative, data-driven, and cloud-based solutions.

SKILLS

>>> Python >>> Django >>> Flask >>> Streamlit >>> JavaScript >>> TypeScript >>> REST APIs >>> Angular
>>> TailwindCSS >>> React >>> Docker >>> Kubernetes >>> kubectl >>> AWS >>> GitLab >>> CI/CD >>> Rancher
>>> PostgreSQL >>> SQL >>> Linux >>> Git

RELEVANT EXPERIENCE

Software Developer (Trainee)

Sep 2025 - Present

Siemens Mobility S.L.U.

- Design, develop, and maintain backend APIs using **Python and Flask** to support internal tools and automation workflows.
- Develop and support **web-based applications using JavaScript** for internal platforms.
- Containerize and deploy applications using **Docker, Kubernetes, and Rancher UI**.
- Contribute to **AI-related initiatives**, supporting the development of data-driven solutions and intelligent systems.
- Collaborate with cross-functional teams following modern **software engineering practices, code reviews, and agile workflows**.

Software Developer (Trainee)

Mar 2025 - Jun 2025

Siemens Mobility S.L.U.

- Contributed to the development of a **web application for the Madrid Metro project**.
- Developed frontend components using **Angular and TypeScript**.
- Supported debugging, testing, and implementation of new features within the development team.

PROJECTS

Personal Developer Portfolio (In Progress)

May 2026 – Present

A personal portfolio website designed to showcase projects, technical skills, and professional experience. The platform highlights cloud, backend, and data-related projects while presenting a clean developer-focused interface.

The application is deployed in the cloud using **AWS Lightsail**, enabling a lightweight and scalable hosting environment for personal projects.

🔗 *React, JavaScript, TailwindCSS, AWS Lightsail, Cloud Deployment*

AWS Quiz Tracker

Apr 2026 - May 2026

An interactive web application designed to help users prepare for AWS certification exams. The platform provides quiz mode and study mode, tracks user progress, and allows practicing with structured question banks.

🔗 *React, Vite, JavaScript, TailwindCSS*

EDUCATION

Higher Technician in Data and Process Analysis (Dual Vocational Training)

2025 - Present

German Chamber of Commerce for Spain (AHK Spanien)

Specialized dual training program combining academic coursework with professional experience. The program focuses on **data analysis, Big Data technologies, Python, AWS, process digitalization, and artificial intelligence**, applied to real-world technology projects.

Higher Technician in Web Application Development

2023 - 2025

IES Virgen de la Paz

Vocational training focused on **full-stack web development**, including backend and frontend technologies, database management, RESTful APIs, and modern web application architecture using industry-standard development tools.

Higher Technician in Administration and Finance

2018 - 2020

European University

Technical program covering **business administration, financial management, accounting, and organizational processes**, providing a strong foundation in business operations and analytical thinking.

CERTIFICATIONS

AWS Certified Cloud Practitioner (CLF-C02)

2026

Amazon Web Services

Foundational certification covering cloud concepts, AWS core services, security, architecture, pricing, and cloud best practices.

Foundations of Cybersecurity

2024

Google

Certification covering cybersecurity fundamentals including **security principles, risk management, threat detection, and basic security operations concepts**.
